DENNIS LIM KAM HO

Tangerang, Banten | +6282125350744 | dennis313lim@gmail.com | linkedin.com/in/dennislimkamho

A fresh-graduate Computer Science student at Bina Nusantara University and passionate Web and Machine Learning system engineer, dedicated to developing and deploying AI-driven solutions by leveraging data science, machine learning, and software engineering. Highly motivated to learn, adapt, and collaborate in dynamic environments to solve real-world problems.

EXPERIENCE

Academic Peer Mentor

Student Advisory and Support Center BINUS University | South Tangerang, Banten — Sep 2022 – Feb 2024

- Guided Computer Science students to achieve better academic results and improve their study motivation as part of my duties upon receiving the Scholarship Mentor from Bina Nusantara University.
- Tutored in programming and AI (ML, NLP, speech recognition, and more), led review sessions and practice tests to strengthen technical skills, and supervised projects and coursework for exam readiness.
- Received training in mentoring and communication through SASC programs to enhance effectiveness in tutoring, conflict management, and knowledge transfer.

Web Developer Intern

Sinarmas World Academy | South Tangerang, Banten — Feb 2024 – April 2025

- Developed and deployed a Face Recognition System using Python, OpenCV, and Docker on a Django framework, automating student pick up identification to improve security and efficiency.
- Engineered real-time face detection for web applications, integrating AI model communication via REST APIs in a containerized model environment.
- Designed and implemented scalable data storage solutions using PostgreSQL and MariaDB, enabling automated ML workflows in containerized environments.
- Applied MLOps best practices for model deployment, monitoring, and performance validation, ensuring reliability through iterative testing on Ubuntu and OpenSUSE Linux.
- Researched and implemented Large Language Models (Google Gemma & Mistral Instruct) with Milvus as a vector database, enabling Retrieval-Augmented Generation (RAG) for a school FAQ web application.
- Leveraged Agile methodologies with Scrum and Jira for ML development, while managing CI/CD pipelines and version control using GitHub.

IT Engineering Officer

Prospercity Group | South Tangerang, Banten — Jun 2025 - Feb 2026

- Built HR ERP module prototype from scratch using Django, designed initial UI prototype, and then collaborated with a team (domain expert, UI dashboard designer, senior programmer) to develop production module in Frappe.
- Implemented business logic in web applications, assisted in deployment on subscription-based remote virtual private Linux server using Docker on Frappe and ERPNext.
- Conducted research in automation and chatbot features for the company website.
- Managed IT inventory, software for PCs/laptops, and performed minor troubleshooting.

EDUCATION

Bachelor of Computer Science

BINUS University | South Tangerang, Banten — Sep 2021 - now

- Current GPA: 3.91/4 | Streaming: Intelligent Systems
- Portfolio: https://github.com/LuSteps

High School Diploma
Strada Saint Thomas Aquino Senior High School | South Tangerang, Banten Jul 2018 – Jul 2021

- Final grade: 84/100
- Streaming: Natural Science and Mathematics

PUBLICATION

A Comparative Analysis of Machine Learning Techniques for Exploring Country Clustering Based on Life Expectancy
International Conference on Networking, Electrical Engineering, Computer Science, and Technology (IConNECT)

- Authors: Dennis Lim Kam Ho, Marcellino Bonamutial, Emmanuel Brandon Hamdi, Karli Eka Setiawan, Muhammad Fikri Hasani
- Accepted at: August 16, 2023

CERTIFICATES

ASEAN Data Science Explorers 2024 Enablement Session – SAP Analytics Cloud and SAP Build Apps Online Training Session
ASEAN Foundation May 2024

- Analyzed sample datasets and developed interactive dashboards using SAP Analytics Cloud, gaining expertise in data visualization and BI tools.
- Developed a simple order management application with a barcode scanner feature using SAP Build Apps.

RISTEK Datathon 2023
RISTEK Fakultas Ilmu Komputer Universitas Indonesia Aug 2023

- Data science team competition experience, accomplished 13th position in public leaderboard.
- Forecasting time-series data of vehicle speed challenge on Kaggle platform, using various machine learning models and statistic methods.

ORGANIZATION & VOLUNTEERS

Cyber Security Activist
Cyber Security Community | BINUS University

- Engaged in Human Resource Division as activist, gaining hands-on experience in organizational communication, teamwork, and leadership within a structured environment.
- Produced and participated in a cybersecurity awareness video campaign, raising awareness on preventing online threats and cyber-attacks.
- Organized and participated in cybersecurity training sessions, collaborating with experts to teach ethical hacking and security techniques using Kali Linux to members of community.

TOP SKILLSET

Web Development & ERP Systems

Django, Frappe, Docker

Machine Learning & AI

CV, NLP, LLMs

Database & MLOps

PostgreSQL, MariaDB, CI/CD

Collaboration & Teamwork

Cross-functional projects

Problem Solving & Adaptability

Automation, chatbot, RAG

Learning & Growth Mindset

Continuous learning, high tech adaptability
